

Medals Are To Be Distributed To Veterans

Department of Veterans Affairs will begin distribution of campaign stars and medals to more than 3,000,000 Canadian veterans of World War II on October 1, Veterans Minister F. Gregg, V.C., has announced.

Although the exact number of veterans in Alberta eligible for these awards is not known because of past fluctuations of population, records show that 82,831 men and women enlisted from this province. This total comprises the following: army 62,716; navy 8,161; air force 21,754.

Mr. Gregg explained that the vast majority of cases veterans will have to apply for medals. Reason is that DVA does not have up-to-date addresses of thousands of ex-service men and women. To facilitate application, special postage-free cards will be placed in all post offices and also in Canadian Legion branches.

Members of the permanent force, however, and certain reserve units will receive their decorations without application, through the Department of National Defence.

"Next of kin of veterans who died on active service are entitled to receive their stars and medals, but no application is necessary as the authorities have accurate addresses of them. However, the official next of kin of those who died since discharge of a non active disability should make application in the same way as a veteran."

All told, the department will distribute a total of 3,000,000 stars and medals plus 549,870 claps. Widest distribution will be that of 1,050,000 copies of the War Medal 1939-45, awarded to all members of the armed forces with 28 days service. Next most common is the Canadian Volunteer Service Medal.

Mr. W. Robinson and Mr. W. Robinson of Pembroke, Ontario spent a few days in town last week visiting their cousin Mrs. J. J. Robinson. They think this is a wonderful country. The arms being so much bigger than the arms in eastern Canada.

John Jaristo who spent some time in London this spring and came fairly well known was killed in a cave in at Brooks last week. He will be remembered as having worked for the City Construction Company when they were laying the new water system in town. He was the man who did all the talking of the pipes and was a great worker.

Because of the large number of possible combinations (there are 11 in the case of medals) and each veteran will receive with his awards a special booklet explaining the method and order of wearing all decorations.

News Items of Local Interest

Next Saturday night the stores will close at 6 o'clock and not a nine as they have during the summer. They will not open again on Saturday evenings until next spring.

Mr. and Mrs. J. Henshaw have moved from Mrs. Bartlett's house to the house formerly occupied by Mr. and Mrs. Barrett and owned by W. J. McKay.

Mr. Walker and Mrs. Miller had as their guests last week Mrs. E. Confort and their brother-in-law Mr. N. Seager of Edmonton.

G. Colpa, the local I.R.C. man, has purchased the R. S. McQueen residence.

Mrs. Freddy Jones of Calgary is spending a few days in town visiting Mrs. P. Lashley.

Kippis Schmidt and his uncle John, of Calgary were weekend visitors to Gleichen. They spent most of their time hunting geese and were successful in bagging some of the birds. While here they were guests of Kippis parents, Mr. and Mrs. W. Schmidt.

Tom Greenway, Eddy Ogden and Elliott Evans of Lethbridge spent the weekend in town. They spent Saturday evening here. Each one was a good shot and they had a good time.

A large number of Gleichen fans attended the rugby game in Calgary Saturday evening. They were a little disappointed at the poor exhibition put up by the visiting team.

T. B. Northfield, Optometrist, successor to E. J. Anderson, will be in town 9 a.m. to 1 p.m., Friday, Sept. 30, and 2 p.m., Friday, Sept. 30, for the purpose of examining eyes, etc.

Mr. E. Robinson and Mr. W. Robinson of Pembroke, Ontario spent a few days in town last week visiting their cousin Mrs. J. J. Robinson. They think this is a wonderful country. The arms being so much bigger than the arms in eastern Canada.

John Jaristo who spent some time in London this spring and came fairly well known was killed in a cave in at Brooks last week. He will be remembered as having worked for the City Construction Company when they were laying the new water system in town.

Because of the large number of possible combinations (there are 11 in the case of medals) and each veteran will receive with his awards a special booklet explaining the method and order of wearing all decorations.

Coast-to-coast radio programs are not broadcast in the way most people imagine. An air show from one city is "piped" by railway telegraph lines to individual radio stations across the country and "aired" locally from each of them.

In India the life expectancy is 27 years; in Canada it is 67 years. Denny Woods who is on the staff of the Vancouver Province arrived in town Friday evening for a two weeks holiday. He did not intend to take his holidays until next month. But on Friday he found out the small game shooting season opened the next day, and being a keen sportsman could not resist the temptation.

not afford to miss that so he hopped on an airplane and landed in Gleichen of course hours later. He came to Gleichen that night by train. The next morning by seven o'clock he had shot down a goose.

Town Engineer, Cameron and his men are preparing to move from their present residence to Mrs. Batsch's house located in the west end of the town.

R. S. McQueen has sold the property best known as the municipal office site to Mr. P. Sawe. Mean time Mr. McQueen has moved his furniture from his residence to the Public Works Department building.

The members of the local Legion are busy fixing up their hall for winter. As present they are getting ready to cover the outside walls with white paint. Already the old brick veneer has been knocked down and the lean to at the rear of the hall is being repaired. W. Campbell is supervising the job.

Post cards have been received by friends in town from Mrs. N. A. Riddell who is visiting relatives in North Dakota and Mrs. J. A. MacArthur who is in Kansas City, Mo. Both reports having a good time.

The Canada-United States boundary line is 3,000 miles long and Canada-Alaska boundary is 1,530 miles long.

Ottawa Letter

There is great excitement among the members of parliament over the changes in money values that are being made with the hope of helping Great Britain in this her time of great need.

The definite result of this is at the moment impossible to forecast but certain general changes in values will be at once apparent.

The devaluation will provide a new attraction for American tourists. Their money will go further in Canada. On the other hand it makes things tougher for Canadian travellers in the United States, as the Canadian dollar will be at about 90 cents which is a firm price, however.

Goods made in England or Scotland will be about twenty percent less expensive than before the devaluation. If this theory works out in practice a British car that cost fifteen hundred dollars in the past will cost

now about twelve hundred dollars. A Canadian made article that formerly sold for \$100 in the United Kingdom will not cost the Britisher \$130.80.

However, it is very definitely stated that the wheat agreement has been retained and the contract price for Canadian wheat is \$2 per bushel, and that is what the U.K. will pay Canada for each bushel.

If you sell cattle in the United States and get American dollars each one will be worth one dollar and ten cents here in Canada.

If Canada had not made the cut the cost of sterling area made goods would have been reduced thirty point five per cent, as the result of the cut the goods from Britain and other sterling areas are reduced 25.6 per cent.

Also without Canada's ten per cent devaluation Canadian goods would have cost the people of England 43.9 per cent more formerly.

With the devaluation of the sterling area people will have to pay 30.8 per cent more if they want Canadian goods. It is fortunate that the wheat price has been retained.

Exact results cannot be predicted yet as all the factors are not clear. F. W. HERMAN.

GRAPES TO THE FORE

Grapes could probably be called Canada's most patriotic fruit since they come in all three colors—red, white and blue. The blue or Concord grape is the one that is used most frequently for making jam, jelly or juice but the white or green grape may be used quite satisfactorily in combination with the blue in this way.

It was thought that the dry weather would take its toll in grapes this year but fortunately there will be a fair crop, no housewives anxious to complete their stock of preserves, should get busy with their preserving kettles and make the most of this fruit while it is in season.

Few people realize just how good fresh grapes are in desserts, particularly in pies, poly, whips and toppings for blance meringue or cottage puddings. The home economist of the consumer, the department of agriculture offer some of their recently tested recipes featuring grapes. The grape chiffon pie will quite rich and a bit finicky to make, is the ideal party or special occasion dessert for this season of the year.

The other grape pie is more family style but none-the-less delicious and flavorful. This pie may be topped with a lattice or pastry a meringue or whipped cream or may be made into individual tarts. However it is served, this pie will be a general favorite of the whole family.

GRAPE CHIFFON PIE: 5 cups blue grapes, half cup sugar, one tablespoon gelatine, quarter cup cold water, half cup whipping cream, eggs, eighth teaspoon salt, quarter cup sugar, 1 nine inch baked pie shell.

Wash grapes and separate skins and seeds. Heat to boiling point and boil gently for five minutes. Rub through sieve to remove seeds. Combine pulp and skins and cook together five

Build it Yourself With EASI-BILD

Full Size Patterns

Build it yourself patterns simply making all the articles illustrated in our catalogue folder. There are FULL SIZE EASI-BILD PATTERNS

for making furniture, toys, and household equipment, while the EASI-BILD Pattern method of construction takes all the mystery out of building everything from a one car garage to a five room, ranch style home.

There are no blue prints to read or scale drawings to follow, because the ACTUAL SIZE patterns show the location of all adjoining parts as well as the location of bolts, screw holes, etc.

EASI-BILD PATTERNS Are economical, most of them sell for less than one dollar. Come in and look over our catalogue of EASI-BILD PATTERNS containing over 100 patterns for making useful articles.

THE DANGER OF POWER

Down through the ages man has striven for power, and yet more power. From the biblical story of creation we learn that man was given power and dominion over beasts of the field, and thus early in his career set out to establish his power over all the forces of nature. From that time down to the present with ever increasing eagerness and energy man has sought power. It is recorded of Alexander the Great that, having conquered the then known world, he sighed for more worlds to conquer. Egypt under the Pharaohs, Rome under the Caesars, Carthage, Greece all great empires of the past strove for power and, having attained it, were ultimately destroyed by it.

Power wielded wisely will increase, but exercised unwisely and uncontrolled will destroy itself. This is just as true in the case of individuals, corporations and associations as it is in the case of rulers, governments and countries. It is especially true of monopolies of all kinds, and it is because monopolies have and do make use of their power unadvisedly and self-

EDMONTON-GREAT LAKES PIPE LINE

The route of the Interprovincial Pipe Line Co.'s 1,150-mile line from Edmonton to the Great Lakes is shown above along with approximate dates and details. The company was sponsored by Imperial Oil. Total cost will be \$90,000,000. Over the rocky, broken route to the Canadian seaboard the line is 120 miles longer. The cost would have been at least an additional \$10,000,000 plus about \$400,000 extra in carrying charges. The line is prohibitive. The line to Superior takes the most direct route possible avoiding towns and other pipe line obstacles, thus providing the low-cost transportation necessary to bring western oil into eastern markets. It will aid the U.S. exchange situation by an estimated \$30 million a year by displacing foreign supplies. More to fill the line will take 1,428,000 barrels—64,330,000 gallons—and it will take 26 days for a barrel of oil to move from Edmonton to the terminus at Superior, Wisconsin. The line's first storage will be built to permit accumulation of oil. During the seven-month open season oil will be picked up by tanker for southwestern Ontario refineries. First oil should reach Regina in the fall of 1950 and movement to Superior is planned for early in 1951.

The Menace Of Fire.

DESTRUCTIVE FIRES ARE an ever-present menace to life and property. Each year scores of homes, places of business, hotels and other structures are destroyed by fire, and many lives are lost. Figures compiled by the Dominion Fire Commissioner on the loss of life and property caused by fire, show that 1947 proper loss amounted to \$57,461, or \$4.68 per capita. Deaths due to fire in the same year numbered 280. In addition to the damage to life and property by fire each year in Canada, there is serious waste of one of our most valuable natural resources, the forests. It is estimated by the Canadian Forestry Association that nearly one million acres of our forest lands have been burned over this year, and such losses are an almost annual occurrence.

A Danger To Our Forests

The great forest fires which break out almost every year not only destroy valuable trees, but in many cases also destroy the topsoil which is equally valuable and in addition, is irreplaceable. In preventing and fighting forest fires, Canada has a great problem and one which involves one of our richest natural resources. Great areas of Canadian forests are in remote regions and are inaccessible because of lack of roads or because of the nature of the land. Another factor which adds to the difficulty of controlling forest fires here is the presence of many coniferous trees, which burn easily. For these and other reasons Canadian forests are very vulnerable to fire, and as yet no way has been found here, or in other countries, to check extensive forest fires.

Difficult To Fight Fires

Forest conservation staffs do excellent work in preventing forest fires and in controlling those which do break out. They also fight fires with the means which are now available, but the problem of getting equipment, and the area where it is needed is often difficult or impossible. Those directly concerned with this problem are of the opinion that great efforts should be made to find ways to check this annual destruction of our forests. The Canadian Society of Forest Engineers has suggested that the National Research Council should be asked to assist and that the Department of National Defence might also be asked to help, since the setting of forest fires by enemy action is a recognized danger in time of war. The loss of life, property, and our forest wealth by fire each year are serious, and the public should lend every support to efforts which are made to reduce this waste and destruction.

No Alberta Aid For Empire Games

CALGARY, Alta.—The Alberta Government gave thumbs down on an appeal for financial aid from the British Empire Games Association of Canada. Calgary Mayor James C. Watson disclosed.

Watson said he had been told of this in a letter received from Lt.-Col. George T. Machum, of Montreal, President of the Association, asked Calgary city council to raise \$15,000, explain that "The Province Government has turned down our request for help—they ought to be told by someone that they must subsidize—Alberta cannot expect the rest of the country to carry their load."

New Alberta Industry Seen

MONTREAL.—The combination of low-cost power sources with abundant chemical resources means that Alberta eventually will support a large and important chemical industry. J. R. Donald of Montreal told the Montreal regional conference of the American Institute of Chemical Engineers.

"Because of the abundant low-cost natural gas, it seems probable that Alberta will, in the future, provide some of the chemical needs of Eastern Canada. In addition to ammonia, such chemicals as methanol and urea as well as the chlorinated hydrocarbons should be produced substantially cheaper in Alberta."

Fined For Leaving Under Quarantine

MOOSE JAW.—In what was believed to be the first case of its kind here Mrs. George Leggett, Eyebrow Bank, was fined \$10 and costs in court for leaving her home which was under a 10-day quarantine for poliomyelitis. Her infant son, Tony, is a polo patient and the home was placed under quarantine.

MARK EXPLORER'S PATH
DARLINGFORD, Man.—Explorer La Verendrye's trip through this area in 1781 will be commemorated by a bronze plaque to be erected east of here. The explorer is believed to have travelled from Fortage la Prairie (then Fort la Reine) south and southwards on his way to the Missouri River.

He Started Something

It was Jim Greenblatt, editor of The Sun in Swift Current, Saskatchewan, who started the subject of dull wedding write-ups. In his front page column recently he asked for some reader suggestions on how to improve wedding write-ups and in a harassed letter warned Margaret Aitken in the Toronto Telegram to stay out of the controversy.

"Take my advice," warns Mr. Greenblatt, "don't get embroiled in this subject." My social-editor, plus the rest of this editorial staff really got into hot water.

It seems one of The Sun's correspondents took editor Greenblatt at his word and wrote a different wedding write-up, with accent on the groom. The whole country has taken sides in the matter, most of them holding the write-up was okay, but since then we have been getting letters galore on the subject, and would that I had never started it," moans Mr. Greenblatt.

Here, in part, is how the "different" wedding write-up appeared in print:

"To the strains of the wedding march, the groom entered the church on the arm of the best man.

The bridegroom, who blushed prettily, was attractively attired in a three-piece suit consisting of coat, vest and pants. The coat was decorated with a white carnation in the left buttonhole. The pants, which were very well air as if the groom suspected it would be the last time he wore the pants, as the saying goes, looked very neat for the occasion. The vest, which was closed in front with matching buttons, was also closed. It was gathered in the back with a buckle and was fastened with small pockets."

There's considerably more in like vein about the groom and about his man. The bride's appearance is summed up in little more than a dozen words:

"The bride, gowned in a white brocade nylon floor-length gown fastened with a hoop skirt and net yoke, carried a bouquet of red roses.

"The groom's mother," editor Greenblatt tells me sadly, "came up to my office boiling, and I do mean boiling." He has decided The Sun will go back to the old hackneyed wedding write-ups!

Expect Oil To Flow To Great Lakes in 1951

CALGARY.—Dr. O. B. Hopkins, vice-president of Imperial Oil and H. H. Howelson, chairman of the board, revealed here that the 450-mile pipeline from Edmonton to Regina is definitely being extended to the head of the lakes, an additional 700 miles, and will be routed through the sedimentary area.

It was also indicated the company is currently contemplating its extended route to run through to Superior, Wisconsin.

The line, originally planned to run from Edmonton to Regina on basis of a 10-inch pipe, was increased to 12 inches and then 16 inches in diameter. Then further enlargement in plans were made as oil resources expanded, which finally ended up with a 20-inch line from Edmonton to Regina, 16-inch line from Regina to Regina, and an 18-inch line from Regina to the head of the lakes.

Estimated cost of this project was placed by Mr. Howelson at \$90 million. It is believed that Imperial will be

HEAVY BEAVER TRAPPING ASKED

THE P.A.S. Man—Manitoba game branch has ordered a five-mile buffer along the provincial border to be trapped clear of beaver. The order is aimed to prevent spreading of a water-borne plague from Ontario into Manitoba.

Registered trappers owners in the area are being advised to trap heavily.

SECOND LARGEST LAKE

Onega lake, Russia, is the second largest lake in Europe. It is 59 miles in its greatest breadth and 140 miles in length.

In a position to move crude from Edmonton to Regina in the fall of 1950, while oil flow from Regina to the head of the lakes should start in the spring of 1951.

OUR COMPLETE SHORT STORY—

FRESH AIR

By MICHAEL TIFF

"THERE'S anything I hate," muttered Bud McDaniels, it's swinging in this pick."

"It's the smart guys that get real joy out of life," said Tim Lafferty. "Dumb fellows like us sweat our heads off for pennies and what we call three squares."

"Bud threw down the stick. 'We're thinking the same. Let's eat.' Climbing out of the ditch, they opened their baskets and began to wolf their sandwiches. As Bud relaxed on an apple, a port portion of a newspaper was blown against him on his back in the sun."

"What you reading?" asked his friend, picking his teeth and lying on his back in the sun. "Listen to this," said Bud. "Says here, 'Not satisfied with a new plane, Clarence Dunne bought a motorboat and took long rides up the Hudson.' That guy sure is one of those smart ones we were talking about."

"What's the headline?" asked Tim. "That part's turn away. But here's some more. 'Clarence became known as Playboy Number One along the Big River. There wasn't a night he didn't visit. When he stepped out with the chorines, he'd trail dollars behind him.' Can you imagine a guy like that?" Bud looked up from the paper and said, "I'd like to enjoy life. Catch him going miles near a pick."

"What I was in his boots. Any more?"

DOES INDIGESTION WALLOW YOU BELOW THE BELT?

How Can You Forget To Be For The Kind Of Food That Makes You Feel Good?

More than half of your digestion is done in the stomach. If you don't get the right kind of food, you'll have indigestion and all the troubles that go with it.

You may want to see a doctor. But first, take one of these Little Liver Pills. They'll help you get the kind of food that makes you feel good. They'll help you get the kind of food that makes you feel good. They'll help you get the kind of food that makes you feel good.

These Little Liver Pills are the kind of food that makes you feel good. They'll help you get the kind of food that makes you feel good. They'll help you get the kind of food that makes you feel good.

Felt Good To Swing The Pick In The Fresh Air After Reading About Clarence

hotels. He ate three times as much as the average man. He considered eating, like other good things in life, something to take advantage of and enjoy. Why else did a man live?" Bud stopped reading, glanced at his friend and sighed.

"Boy, he sure did have the right slant," said Tim. "Why, I'd call him the smartest man that ever breathed."

"Only took us like work like slaves and for what? Some beef sandwiches and a hard bed to sleep in. And my friend and I, what do we get out of it? Why, Clarence Dunne had something to offer a girl," Bud turned the paper around. "Look, there's more on this side. 'Clarence Dunne laughed when reporters asked him whether he liked to work.'"

"Work," said Clarence with a knowing wink. "What do you take me for? I tried work once. I didn't take to it or maybe it didn't take to me."

"Bud, after hearing about Clarence, I'll be hanged if I care to go back to that ditch with the dumb bounks."

"Tim, it's about time we wised up. Got smart. Look Tim, here's a guy that woke up one day and used his wit to get himself together. A pile. After that he just went out and spent it."

"The other men were rubbing their lunch into the road. Some of them were sweating and straining."

"Anything more about this Clarence guy?" inquired Tim hopefully. "Just a few more words down here at the bottom. Bud concentrated upon the bit of paper before the signal from the foreman would end their rest."

"It says, 'Clarence remained quite calm and at ease as he was led away by the police.' What's this about the police?" Bud leaned closer to the ground and Tim stopped forward, his eyes cocked.

"Go on, read, Bud."

"To the cell which will be Clarence Dunne's home for the next 20 years—the total sentence for the charge of robbing the ditch."

Bud and Tim exchanged silent glances. Then they picked up their tools and went back to the ditch. "Feels good swinging this pick," said Bud.

"And plenty of nice fresh air," said Tim. (Copyright Wheeler Newspaper Syndicate)

Large Sum For Oil Search In British Columbia

VANCOUVER.—About \$350,000 is expected to be spent by Royalite Oil Co., in its first British Columbia oil effort. For the first time in B.C.'s history a major Canadian oil company is making a large scale bid to discover oil within its boundaries.

Prospects of finding oil on the Queen Charlotte Islands, off the northern B.C. coast, are good. Royalite President S. F. Heard thinks Geologists have noted oil pools and seeps for years, and some report that the structure is very similar to the famed California basin.

THE ALBERTA BREWERS' AGENTS
DEALING WITH

PREDATORS OUTLAWS AT LARGE

Your Co-operation

IS REQUESTED IN THIS SURVEY

To secure a factual appraisal of the actual losses caused by predators, the Western Stock Growers' Association is asking Farmers and Stockmen to supply the following information:

1. What damage and number of livestock have you lost to wolves or coyotes during 1949.
2. Have you sustained damage or losses in poultry, or livestock by cougars, bears or other predators?
3. What losses have been caused by humans or trappers?

The purpose in securing this information is to place the facts before the government in a co-ordinated effort to get effective action to control these predators.

Town & District

Saturday the country swarmed with small game hunters. Some hunters were very successful while others were not so lucky. It was a fine day, in fact it was too fine a day for the hunters since the birds flew high. Those who spent some time a few days before the season opened looking for likely spots to shoot and got out early Saturday morning got something for their efforts.

Town Engineer Cameron and Assistant Engineer Taylor have been busy these days getting the arena in shape for the coming winter for the boys and girls of the town to have some real amusement. The area where the ice is made was covered with weeds three feet high. These have been cleared up and burnt and the ground made ready for flooding.

SEEDTIME AND HARVEST

DR. F. R. SEABEY,
Director,
Line Elevator Farm Service,
Winnipeg, Manitoba.

Testing Farmers' Seed For 1950

In successful grain crop production no single factor is more important than the use of good seed. The most careful cultivation, even of the best land, will not produce a good crop from poor seed.

Conditioners' Unreliability. This year, in many districts, drought, second growth, hail and frost will seriously affect the available supply of high quality seed-grain. This means loss to the farmer through reduced yields, lower grain prices and in many cases, the necessity of buying new seed.

In his interest, every farmer should make sure that the grain he intends to use for seeding purposes in 1950 is satisfactory from the standpoint of germination, purity (freedom of weed seeds) and freedom from smut.

Seed Laboratory. To assist farmers in determining the quality and value of their own grain for seeding purposes the Line Elevator Companies, through their Farm Service Department, operate a first-class seed testing laboratory. For the past ten years, this laboratory has provided reliable seed testing service to the farmers of Western Canada, free of charge. More than 10,000 prairie farmers made full use of this service last year.

Tests Offered. Again this year, we will undertake to test farmers' seed samples of Wheat, Oats, Barley, Rye and Flax for: (1) Germination. (2) Smut and other seed-borne diseases. (3) Weed seeds. (4) Mechanical seed injury. (5) Purity of variety. Seed for varietal purity is, however, confined to seed of wheat and barley.

Seed Samples. Farmers are invited to deliver seed samples (5 ounces of cleaned seed), which are truly representative of the seed lot to be tested, to their nearest Line Elevator Agent. Agents will provide seed envelopes, labels, etc., and forward the samples to Winnipeg for testing.

Warning. Seed tests made by Line Elevator Farm Service are not official government tests. The results of such tests cannot be used legally when advertising seed for sale. If you want an official government test, send samples directly to the Plant Products Division (Seed Laboratory), Winnipeg, Saskatoon or Calgary.

quarters. There are not nearly enough rooms for residents or transients, not enough space for club meetings, handicraft classes or entertainments; the gymnasium is far too small for proper exercises and there is no swimming pool. The kitchen are antiquated, the plumbing old-fashioned, and the whole building so structurally weak that it can neither be remodelled nor repaired.

If the Y.W.C.A. is to serve the best interests of the out-of-town girls who seek aid, it must have a new building and it appeals for support—not only from those who have benefited in the past, but from the parents of girls who will be going to Calgary to work or to attend school. Contributions may be sent to Y.W.C.A. Building Campaign Headquarters 222 Twelfth Avenue West, Calgary, and be deducted from income tax.
